FOREWORD

This report, the third in the "Vocational Education Information" series for fiscal year 1972, consists of computer printouts of statistical data compiled by State from State annual reports. Programs were financed by Federal, State and local funds and were conducted under the approved State plan for vocational education. Federal funds used to support the State programs were authorized by the Vocational Education Act of 1963, as amended (P.L. 90-576).

The series of State-by-State tables include 24 relating to expenditures, 3 relating to number of teachers, 1 dealing with teacher training, 21 relating to enrollments in various programs, and 4 relating to placements of program completions. It should be noted that certain tables cannot be precisely compared due to rounding into thousands and the inability of a few States to supply the detailed data. Fiscal data are subject to audit and are to be considered provisional.

Due to changes in reporting requirements and new legislation, some of the statistics are not necessarily compatible with those published in previous years. However, the State data should prove useful to all persons interested in assessing the scope and progress of vocational education in the United States and particularly those individuals who are concerned with planning.
